RESEARCH INTEREST

Development Economics, Labor Economics, Economic History

EDUCATION

National Taiwan University

Taipei, Taiwan

M.A. in Economics

Jan. 2026

- Ph.D. Courses: Microeconomic Theory (I) (A+), Macroeconomic Theory (I) (A+), Econometric Theory (I)(II) (A+/A,A+)
- Graduate Courses: Topics in Experimental Economics, Topics in Labor Economics, Machine Learning and Econometrics

National Taiwan University

Taipei, Taiwan

B.A. in Economics

Jun. 2024

- Received a Dean's List Award in Jun. 2022.
- Math Courses: Introduction to Mathematical Analysis (Real Analysis), Linear Algebra,
Graduate Courses: Labor Economics, Health Economics, Data Science and Social Inquiry, Applied Financial Econometrics

RESEARCH EXPERIENCE

Institute of Economics, Academia Sinica

Taipei, Taiwan

Research Assistant to Research Fellow [Yating Chuang](#)

Aug. 2024 – Jan. 2026

- Collect and integrate multiple datasets (e.g., survey data, 10% census microdata, geographic data) from Statistics South Africa to visualize the long-run effects of Apartheid on local socioeconomic outcomes.
- Construct efficient code to analyze how BEE policies shaped African-owned private firms using South Africa Tax data.

C2L2 Lab, National Taiwan University

Taipei, Taiwan

Research Assistant to Professor [Kuan-Ming Chen](#)

Feb. 2023 – Jan. 2026

- Process and analyze over 20 million individual-level records from Taiwan's Fiscal Information Agency using the `data.table` package in R, covering personal tax filings, marital status, employment history, and firm characteristics.
- Compile summary statistics on house inheritance to evaluate its impact on individuals' marriage market positioning and partner matching patterns.
- Link employment records with firm-level training data to estimate the effect of on-the-job training programs on subsequent wage growth using fixed-effects regression models.

RESEARCH PROJECTS

[Exiled Regimes and Gender Norms Diffusion](#)[\[Slide\]](#)

Feb. 2025 – Present

Master Thesis Supervised by Professor [Elliott Fan](#)

- Exploit the public settlements (*Juancun*) in Taiwan to examine the impact of cultural transmission of gender outcomes.
- Document the exposure intensity to a gender-equal ethnic group significantly increases labor participation among local females, along with declining fertility and son preference.
- Incorporate multiple historical archives and utilize QGIS spatial analysis tools to measure geographic distances between administrative boundaries and public settlement for spatial correlation studies.

The Impact of Port Opening in Late Qing Dynasty on Market Integration

Dec. 2023 – Present

Coauthor with Professor [Hui-Wen Koo](#)

- Causally estimate the impact of port openings on grain market integration in late Qing China.
- Develop a Difference-in-Differences identification strategy incorporating historical weather and distance data to measure the causal effect of port openings, which significantly accelerated grain price convergence.
- Propose a QGIS-based technique to convert historical Chinese weather maps into geospatial vector data.

GRANTS & AWARDS

- | | |
|---|-------------|
| • Scholarships of Shanghai Commercial & Savings Bank | Spring 2026 |
| • Liu Ta-Chung Education and Culture Foundation Scholarship | Spring 2026 |
| • Dean's List Award (top 5%), | Fall 2023 |

SKILLS

Programming: R (Advanced), $\text{\LaTeX}$ (Advanced), Stata (Intermediate), Python (Intermediate), QGIS (Intermediate), Matlab
Languages: English (Fluent), Mandarin (Native)
